Open to Remote / Hybrid roles (Local / International)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with a security-first approach, specializing in the React/Next.js and Node.js/NestJS ecosystem. Proven experience as a founder and lead developer, shipping scalable SaaS products and architecture from concept to production. Committed to clean code, automated testing, and secure development lifecycle (DevSecOps) practices. IBM-certified in Software Engineering & DevOps, currently finalizing a Bachelor's in Computer Science. Seeking to contribute to high-impact remote teams in local et international.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap 5.

Backend: Node.js, NestJS, Express.js, Python (Django, Flask), REST API, Microservices.

Database: PostgreSQL, MongoDB.

DevSecOps & Security: Docker, CI/CD (GitHub Actions), Secure Coding (OWASP Top 10), Vulnerability Scanning (SonarQube/Snyk), Linux.

Tools & Methodology: Git/GitHub, Figma, Agile/Scrum, System Design.

PROFESSIONAL EXPERIENCE

Founder & Full Stack Developer - Solutions Technologie Hub

Remote, Haiti | Juin 2026 - Present

- Founded and lead a software development agency, overseeing full-cycle delivery from client requirements through architecture, development, and deployment.
- Designed and built the agency's multi-page company website end-to-end (HTML5, CSS3, JavaScript, Bootstrap 5) - Home, About, Services, Portfolio, Partners, and Contact.
- Serve as the technical builder for Zye Klere, translating cybersecurity awareness requirements into a functioning SaaS product.
- Lead ongoing development of client platforms, including a media/journalism CMS with multi-author publishing rights and a photography portfolio platform with an admin dashboard for content and promotions management.

Co-Founder & Full Stack Developer - Zye Klere

Remote, Haiti | Aout 2026 - Present

- Co-created a cybersecurity and digital-security awareness SaaS platform for the Haitian community, aligning product decisions with practical security education.
- Built a browser-based avatar generator tool and supported the platform's launch across multiple social channels.
- Designing planned platform features, including a security-awareness article system, video tutorials, and a password/email exposure checker.

PROJECTS

Web Security Checker (Personal Project) - Built a website vulnerability scanner that flags common security misconfigurations, applying OWASP-aligned secure-by-design principles.

Personal Portfolio - fednelcharite.com - Built a bilingual (EN/FR) portfolio site with Next.js, React, TypeScript, and CSS Modules.

StayHealthy (Capstone Project) - Built a medical appointment booking application using React.js.

EDUCATION

Bachelor's Degree (Licence) in Computer Science

UNITECH, Haiti | Expected 2026
