Open to Remote, Hybrid, or On-Site Roles (Local & International)

PROFESSIONAL SUMMARY

Junior DevSecOps Engineer with a strong software engineering foundation and a security-first mindset, focused on secure cloud deployment, CI/CD automation, and infrastructure practices. Hands-on experience architecting and deploying backend services and web applications using Docker, cloud platforms, and automated GitHub Actions pipelines, gained as a technical founder shipping real products from first requirement to production. Comfortable applying OWASP-aligned secure coding practices, vulnerability scanning, and Infrastructure-as-Code fundamentals across the development lifecycle. IBM-certified in Full Stack Software Development and Software Engineering & DevOps, currently completing a Bachelor's degree in Computer Science. Looking to grow as a DevSecOps engineer on a remote-friendly team, local or international, that values secure, automated, and reliable delivery.

TECHNICAL SKILLS

DevOps & Cloud: Docker, Kubernetes (Orchestration), AWS (Cloud Fundamentals & Deployment), Vercel, Linux, Bash Scripting

CI/CD & Automation: GitHub Actions (Pipeline Automation & Continuous Deployment)

Security & DevSecOps: Secure Coding (OWASP Top 10), Vulnerability Scanning & Code Quality (SonarQube, Snyk), Infrastructure as Code (Terraform Fundamentals), Network Security (DNS/TLS)

Development & Supporting Stack: TypeScript, JavaScript, Node.js, NestJS, PostgreSQL, Git/GitHub Workflow

PROFESSIONAL EXPERIENCE

Co-Founder & Security/DevOps Engineer - Zye Klere

Remote, Haiti | August 2026 - Present

- Co-created a cybersecurity and digital-security awareness SaaS platform for the Haitian community.
- Architected backend services and deployed secure web applications utilizing modern cloud infrastructure.
- Implemented automated deployment pipelines and security validation protocols to safeguard the platform's release process.

Founder & DevOps Engineer - Solutions Technologie Hub

Remote, Haiti | June 2026 - Present

- Founded and lead a software engineering agency, managing end-to-end delivery and deployment pipelines for client web platforms on cloud services and Vercel.
- Standardized client application deployments with Docker and cloud hosting, improving consistency from development to production.
- Serve as the technical DevOps backbone for Zye Klere, handling deployment infrastructure and security validation for its SaaS platform.
- Also designed and built the agency's public website end-to-end (HTML5, CSS3, JavaScript, Bootstrap 5).

PROJECTS

Web Security Checker (Personal Open-Source Project) - Developed an API-driven website vulnerability scanner and security posture auditor that inspects HTTP security headers, TLS configurations, and flags OWASP Top 10 misconfigurations. Designed for integration into CI/CD pipelines.

EDUCATION

Bachelor's Degree (Licence) in Computer Science

Université de Technologie d'Haïti (UNITECH), Haiti | Expected Late 2026

CERTIFICATIONS

Completed: IBM Full Stack Software Developer Professional Certificate • IBM Software Engineering & DevOps Professional Certificate • IBM Full Stack JavaScript Developer •

In Progress: Cisco Cybersecurity Analyst Certification • CompTIA Security+ • AWS Certified Developer Associate • Microsoft Azure Developer Associate.
