

FEDNEL CHARITÉ

Back-End Software Engineer • DevSecOps Mindset

Port-au-Prince, Haiti • +(509) 3155 4716 • contact@fednelcharite.site
github.com/feddy509 • linkedin.com/fednelcharite • fednelcharite.site
Open to Remote / Hybrid Roles (Local & International)

PROFESSIONAL SUMMARY

Back-End Developer with a security-first mindset, specializing in building robust APIs and services with Node.js, NestJS, and Express.js, backed by PostgreSQL and MongoDB. Founder of a software development agency, with hands-on experience designing REST APIs, microservices, and authentication systems from first requirement through production. Focused on clean architecture, automated testing, and secure-by-design (DevSecOps) practices - from input validation and OWASP-aligned coding to vulnerability scanning and CI/CD pipelines. IBM-certified in Back-End Development and Software Engineering & DevOps, currently completing a Bachelor's degree in Computer Science. Open to joining a remote-friendly engineering team, local or international, that treats backend reliability and security as first-class concerns.

TECHNICAL SKILLS

Backend Development: Node.js, NestJS, Express.js, Python (Django, Flask) - RESTful API Design, Microservices Architecture, System Design, Authentication & Authorization

Databases: PostgreSQL, MongoDB - Schema Design, Query Optimization

Security & DevSecOps: Secure Coding (OWASP Top 10), Vulnerability Scanning (SonarQube, Snyk), Docker, CI/CD (GitHub Actions), Linux

Frontend (Supporting): React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS

Tools & Methodology: Git/GitHub, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Founder & Back-End Developer - Solutions Technologie Hub

Remote, Haiti | June 2026 - Present

- Founded and lead a software development agency, owning backend architecture and API design across client projects from requirements through deployment.
- Built the backend and admin dashboards for a media/journalism CMS with multi-author publishing rights, and a photography portfolio platform for content and promotions management.
- Serve as the technical builder for Zye Klere, designing its backend architecture and API layer.
- Also designed and built the agency's public website end-to-end (HTML5, CSS3, JavaScript, Bootstrap 5).

Co-Founder & Back-End Developer - Zye Klere

Remote, Haiti | August 2026 - Present

- Co-created a cybersecurity and digital-security awareness SaaS platform for the Haitian community, designing the backend services behind its security-education features.
- Built the backend logic for a browser-based avatar generator tool and supported the platform's launch across multiple social channels.
- Designing planned backend features, including a password/email exposure-checker service and the data model for an upcoming security-awareness article system.

PROJECTS

Web Security Checker (Open Source) - Built a backend-driven website vulnerability scanner that verifies SSL/TLS certificates, inspects HTTP security headers, and flags common misconfigurations, generating a detailed security report. Open-sourced the codebase for community contributions, following OWASP-aligned secure-by-design principles.

Auth Secure App - Built a backend authentication system with secure session/token handling, password hashing, and protections against common web vulnerabilities, following OWASP authentication best practices.

Secure Todo App Built a task-management REST API with a security-first architecture, covering user authentication, input validation, and access control.

SYGEPREM - Medical Appointment Management System (Capstone Project) - Designed the backend and data model for a medical appointment booking and management application (React.js frontend).

EDUCATION

Bachelor's Degree (Licence) in Computer Science

UNITECH, Haiti | Expected Late 2026

CERTIFICATIONS

Completed: IBM Back-End Developer • IBM Software Engineering & DevOps Professional Certificate • IBM Full Stack Software Developer Professional Certificate • IBM Full Stack JavaScript Developer.

In Progress: Cisco Cybersecurity Certification • CompTIA Security+ • AWS Certified Developer Associate • Microsoft Azure Developer Associate.
